

FilterBoxx Water & Environmental Announces Pharmaceutical Wastewater Recycle Project Award

Calgary, Alberta (February 22, 2016): Mr. Larry Novachis, Chief Executive Officer at FilterBoxx Water & Environmental Corp. (“FilterBoxx” or “the Corporation”) announces that FilterBoxx Packaged Water Solutions was awarded the contract to supply a 410 m³/d wastewater treatment and recycle plant for a Pharmaceutical Company. The company is one of the world’s largest medical device manufacturers, 5th largest pharmaceutical company, 6th largest biotech and 6th largest consumer healthcare companies in the world.

“With more and more plants looking to save money, infrastructure and utilities can often be the source of effective change and savings. The cost of water, wastewater and energy continue to increase on an annual basis without sign of change” comments Novachis. “The company elected to take action to put control of costs into their fiscal mandate. There were several initiatives, and one of these was to find a means to reduce the wastewater from the facility while also offset the cost of fresh water by recycling” he adds.

The final effluent from the plant was discharged to the municipal authority at a fee. The raw water for the cooling towers was provided by the municipality authorities at a fee. By recycling the wastewater the company can reduce their operating cost while providing better water quality to their cooling towers.

The FilterBoxx solution includes a skid based Ultrafiltration membrane plant and Reverse Osmosis plant. The Ultrafiltration system is designed to operate at 96% recovery and the Reverse Osmosis system is 90% recovery for a total plant recovery rate of over 86%.

About FilterBoxx Water & Environmental

FilterBoxx Water & Environmental Corp. operates subsidiaries as **FilterBoxx Packaged Water Solutions** and **FilterBoxx Energy Services**. Packaged Water Solutions is solutions based supplier of standard and custom water and wastewater treatment systems. FilterBoxx Energy Services provides Rental Equipment, Services and Plant Operations to our rental fleet of water and wastewater treatment systems. Energy Services also supports our Design-Build-Own-Operate (DBOO) plants operating throughout Canada and the USA.
